## DETAILED ACTION

### *Election/Restrictions*

1. Claim 73 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 17 April 2004.

Claim 73 recites that the spring element is arranged outside the allocated piston/cylinder assembly, however the elected species shown in Fig. 18 only includes the resilient element as being located inside the piston/cylinder assembly.

### *Claim Rejections - 35 USC § 112*

2. Claims 69-74 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

There is no structural relationship recited between the spring element and the bicycle, and the locking device and the bicycle.

3. Claims 74-76 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 74-76 recite a locking device for locking the adjusting device. However, according to the specification, the locking device comprises the piston/cylinder assembly and the

Art Unit: 3611

shut off device, which have already been recited in claim 60. Furthermore claims 75-76 recite a “spring/damping element”, however it is not clear from the specification as to what element this represents.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 60-61, 69-72, 74-78 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Girvin.

Girvin discloses a bicycle comprising:

a frame 12;

an adjusting device 16 adjusting a height of a front wheel suspension (see column 6 lines 7-10;

wherein said adjusting device comprises a double-acting piston/cylinder assembly 20 with a first cylinder chamber 56 and a

second cylinder chamber 70 separated by a piston 62 that is connected to a piston rod 60, said two cylinder chambers being connectable with one another via a fluid channel 74, and said piston rod mounted on a steering stem;

Art Unit: 3611

a shut-off device 86 positioned in said fluid channel; and  
wherein said shut-off device is actuatable via an actuator 88 that is spaced apart from said shut-off device;  
said acutator being arranged in a region of a handle bar 13;  
further comprising a resilient spring element comprising a mechanical compression spring 92 arranged in a cylinder chamber of the piston/cylinder assembly.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
